

Qualified to manage your security easily

Video Recorder 400 Series

Professional video recording and management

BOSCH
Invented for life

Looking for a hassle-free, cost effective solution that delivers what you need, when you need it, in the easiest way possible? For systems of up to 4 analog cameras, our Video Recorder 400 Series is the one to choose.

Ideal for residential and small business applications including shops and offices, this simple, no-nonsense recorder is a complete and very easy to use video management solution. A single, integrated, stand-alone system, the 400 Series operates 'straight from the box'. Simply connect the cameras and power, and the unit begins recording automatically.

Clever and convenient

Operating the Video Recorder 400 Series is simple and very convenient. You don't even have to be on-site to manage your system - web-based remote management puts control at your fingertips from any location. In the event of an alarm, the video manager alerts you instantly by automatically sending an e-mail. And the 'Smart Search' utility saves you time, helping you locate recorded events quickly by looking for changes in selected areas.

Less storage, more detail

Fitted with the latest H.264 video compression technology, the 400 Series ensures you get plenty of recording time without spending a fortune. Bosch's implementation of the H.264 standard lets you store at least 30 days of video.

Keeps on running

Our Video Recorder 400 Series gives you the quality and reliability you expect from Bosch – the best on the market. Continuous, rigorous testing allows us to constantly improve quality, even though we are already well above industry levels. This means you can rely on Bosch to keep on running, minimizing down-time and total cost of ownership.

Features	Benefits
4-Channel real-time advanced H.264 recording	Records at least 30 days of video
View and record video in CIF, 2CIF or 4CIF resolution	Flexible image resolutions to fit your needs
Built-in web viewer for remote viewing, playback, control and management	Convenient control from any location. View live and recorded images over WAN, LAN or internet
Supports VGA and analog monitor output (up to 1280 x 1024)	Ensures best resolution for optimized viewing on any monitor
Dual streaming for local recording and live network viewing	Independent streams for ultimate flexibility when viewing over networks/internet
Smart Search	Time saving utility locates events quickly by looking for changes in a selected area
Audio In/Out	See and hear all the details
DVD writer and USB ports	Easy export of video to external storage devices
Alarm inputs and outputs	Trigger alarms automatically by using door, window or other contacts, or connect to an audible alarm.
Email alerts	Receive an email alert whenever an alarm is triggered, even when not on-site
Optional internal DVD writer, and either 1 or 4 audio inputs and alarm outputs	Choose the system that best meets your needs

When you need a simple, reliable surveillance solution, let the Video Recorder 400 Series manage your security easily.
